The academic seminar De-carbonisation and resilience in Logistics, organised within the LOGMASTER Erasmus+ project framework, explored the current state of research and practical approaches to decarbonisation and resilience in logistics. Hosted by Università Cattolica del Sacro Cuore in Piacenza, the event featured keynote contributions from Prof. Alan McKinnon of Kuehne Logistics University and Prof. Barbara Perry Gouveia from the Universidade de Lisboa. Moderated by Prof. Paolo Bisogni and Prof. Franca Cantoni, the seminar examined how logistics organisations are adapting to sustainability challenges and the essential role European higher education institutions play in preparing experts capable of managing resilient, low-carbon supply chains.
